

About Doyenz

Founded in November 2007, Doyenz is a privately held software company operated independently by a dedicated team based in Bellevue, Wash. Angel investors and the Doyenz team share ownership of the company.

Doy·enz: (noun) a revolution in disaster recovery for small and mid-sized businesses, hosted in the cloud and delivered strictly through the reseller channel. This iteration of the word is a result of the inability to secure the domain name doyen.com.

Origin (via Merriam-Webster): the senior member of a body or group. From the root Doyen, a French word, from Old French deien, from Late Latin decanus dean

Mission

Our mission is to provide flexible, cloud-based disaster recovery services, delivered through our partners, enabling them to do more with their clients' bits in the cloud.

Overview

Doyenz provides an innovative cloud platform that meets the business continuity needs of small and medium-sized businesses. Doyenz rCloud is the only cloud recovery solution that replicates and recovers VMware ESX virtual machines for SMBs. With rCloud, IT service providers can restore virtual production server environments in under fifteen minutes, providing quick access to business critical applications. Through a simple online portal, IT professionals use rCloud to instantly verify that their production servers are replicated and ready to be restored in the event of an outage. As a result, IT service providers can reduce recovery time objectives and ensure the continuity of business operations if disaster strikes. Doyenz is a privately held company based in Bellevue, Washington. For more information, please visit www.doyenz.com.
